## Employment

I worked for Scottish Television from January 1978-May 2006 starting as a 'Trainee Sound Technician' straight from Napier College, Edinburgh and progressed to Senior Sound Engineer. As an employee of Scottish Television during the 90's 'Multi-Skilling' was encouraged and as a result allowed my extensive studio and OB experience to develop as a Floor Manager/AD. By the mid 90's I gained the full time position of FM/AD with the flexibility of also working as a Sound Engineer if required, this is still my situation.

## Personality

I am a calm but authoritative person who works well with others. I have an outgoing nature and find assessing, communicating as well as interacting with people comes naturally to me. I also regard efficiency very important and have no problem working under pressure. I hold a clean UK driving licence. References are available on request.
