Here is my current cv and credits. This information is also available on my website, www.groovytelevision.com

I am currently available for work and have been freelance since August 1996.

I have over 20 years' experience as both off-line and on-line editor mainly using Avid (Symphony, Media Composer, Interplay) and also Final Cut Pro and even on tape.

I have worked on a wide variety of programming across different genres including factual entertainment, ob-doc, rig shows, music, current affairs and specialist factual. These have been for UK Network, Nations and Regions, daytime and international broadcasters including US channels such as Discovery and Nat Geo.

I am available for both online and offline work at competitive, negotiable rates. I have bases in Cardiff, London, Glasgow and can work worldwide.

I am also able to work remotely on Avid.

I look forward to hearing from you.

Yours sincerely,

Nick Kershaw
